5. Roof bridge
6. Ridge capping
7. Verge trims
8. Eaves flashing
9. Lead-ins
10. Chimney sheets
11. Valley flashing
12. Joint flashing

## 7. Packing standards for steel roof sheets:

- 1) All the steel roof sheets will be sealed with PVC film to protect the surface coating from damage;
- 2) For export packing standards:Our factory is usually using kraft paper as first layer to pack the steel sheets.Then use steel piece and sheets as second layer to make sure all the roof claddings are in good status before unloading.

- 3) After finishing the packing,we will put sleeper or foam or steel purlins as support in clean place,and then stack them in safe area, to avoid any damage problem before shipping.
